

C4.0

ROAD TOUR

CONSTRUCTING THE FUTURE:
THE REVOLUTION IS HERE

This seminar series is one of CIDB Malaysia's initiatives to achieve the objectives of the Construction Strategic Plan 4.0. The plan emphasizes 12 technologies in the construction industry, including digital and emerging technologies. These technologies offer new opportunities to enhance competitiveness, improve work quality and efficiency, and increase productivity.

The 12 emerging technologies that will be in focus are as follows:

- Prefabrication & Modular Construction
- Building Information Modeling (BIM)
- Autonomous Construction
- Augmented Reality & Virtualisation
- Cloud & Realtime Collaboration
- 3D Scanning & Photogrammetry
- Big Data and Predictive Analytic
- Internet of Things
- 3D Printing & Addictive Manufacturing
- Advanced Building Materials
- Blockchain
- Artificial Intelligence

The goal of this seminar is to raise awareness and general acceptance of the benefits of BIM and digital technologies and to encourage broader engagement from various stakeholders within the national construction industry ecosystem.
